Introduction	3
1 Overview of menu creation function	4
2 System configuration.....	5
3 System requirements	6

1 Introduction

This document describes the system configuration and environment construction for operating the parameter sheet creation function of ITA.

It is assumed that the basics functions of ITA are already been constructed for using menu creation function.

Regarding the construction of ITA basics functions, please refer to 「System Configuration/Environment construction guide_basics」

2 Overview of menu creation function

The uses of menu creation function are as follows.

Please refer to 「User instruction manual_ Menu Creation Function」for further details.

Table1 Overview of menu creation function

No	Function name	Use	WEB contents	BackYard contents
1	Menu Creation Function	Create and manage Menu (Web menu).	○	○

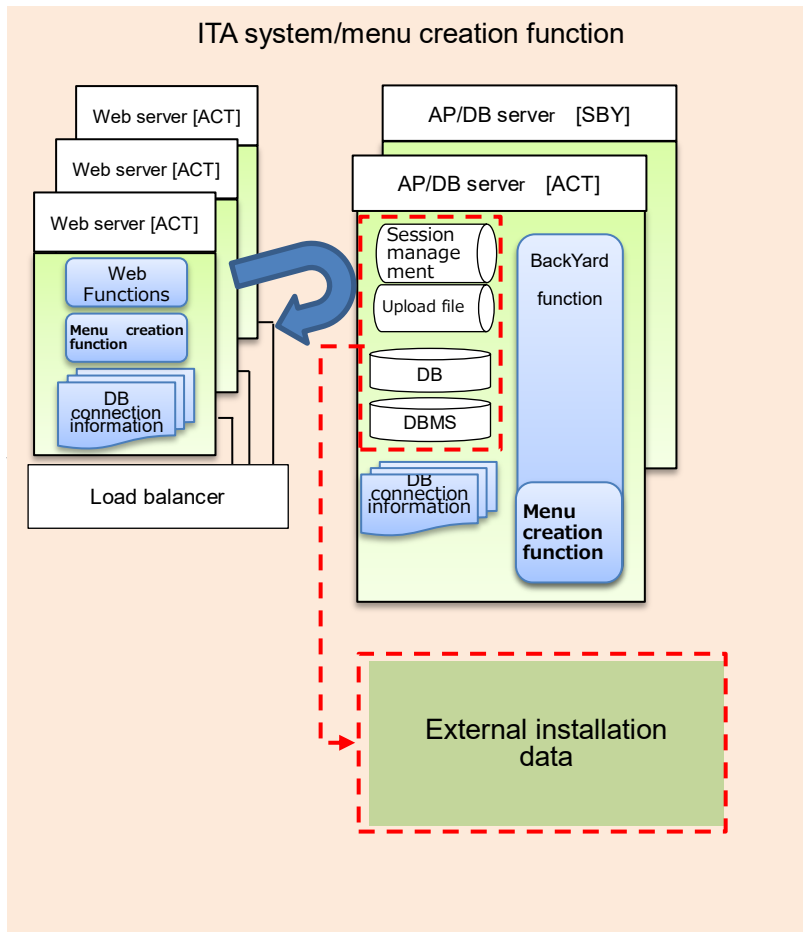

3 System configuration

The system configuration of the menu creation function is the same as the ITA system.

In this section, this figure shows the balanced HA type configuration, which is the recommended configuration for the ITA system.

※ The schematic diagram shown here is omitted.

For details, please refer to 「System Configuration/Environment Construction guide_basics」.

4 System requirements

Menu creation function follows the system requirements of ITA system, so please refer to「System Configuration / Environment Guide_Basic」.
